

Historical artwork and UFOs by Matthew Hurley

A.D.

Hello and welcome to my website. For a number of years I have been intrigued by old artwork that appears to depict UFOs. The artwork shown below ranges in age from the 12th century up to the late 1700s and consists of frescos, tapestries, illustrations and oil paintings. Although some of the artwork below represents actual sightings, others feature UFOs in a religious context. One can only guess at why these artists chose to insert UFOs into their artwork. Did they have UFO sightings in their day and decide to add them in ? Perhaps they had an inner urge to insert them. Maybe they had some arcane knowledge about the relationship between UFOs and certain religious events. Whatever the truth is, there are UFOs in these pieces of artwork and one can ponder and reflect on this truth.

I have now expanded my site into an older epoch, click [here](#). I am always on the lookout for more UFO artwork. In particular there is a painting by Sano Di Pietro called "The Virgin and the Six Saints" (shown on the UK series The Why Files by an elderly gentleman along with other pictures which I have below), and there is a medieval painting of a nobleman on horseback pointing at a UFO (it is shown in part one of the UFOs Then and Now documentary). If you have these pics or others please send them to me or point out where I can get hold of them. m.hurley@ntlworld.com (U.K.). Enjoy the site...

DISCLAIMER : I do not claim to have "discovered" the artwork on my website. I am simply collating together under one roof what I have seen in documentaries and books and also what people are sending me.

Here are some [frequently asked questions](#).

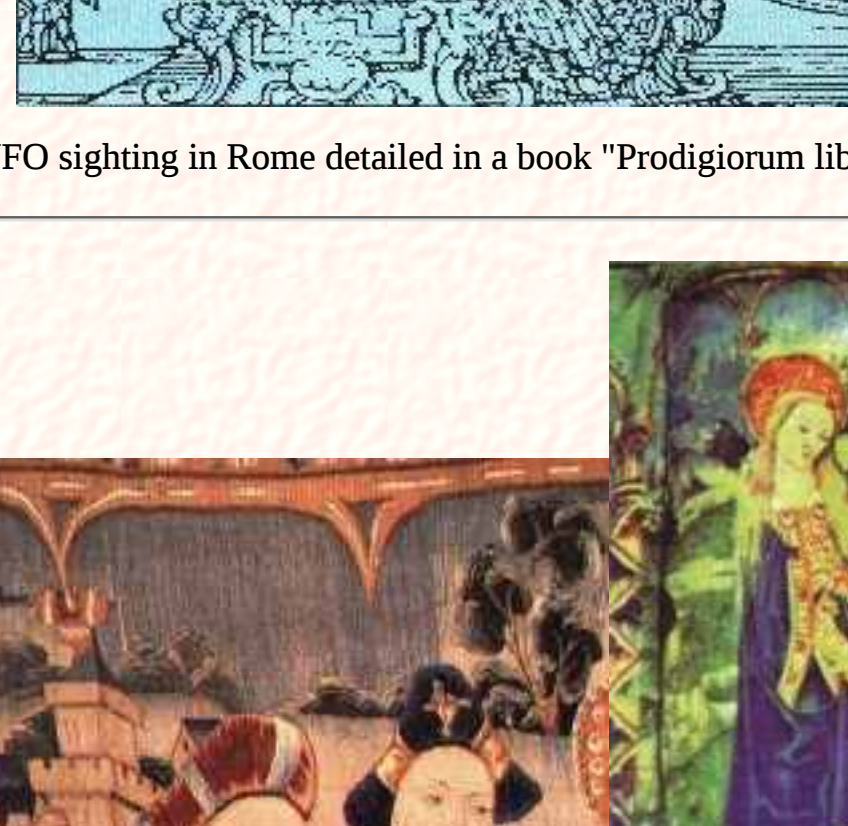

Thanks to all the people who have sent me pics, leads and other info.

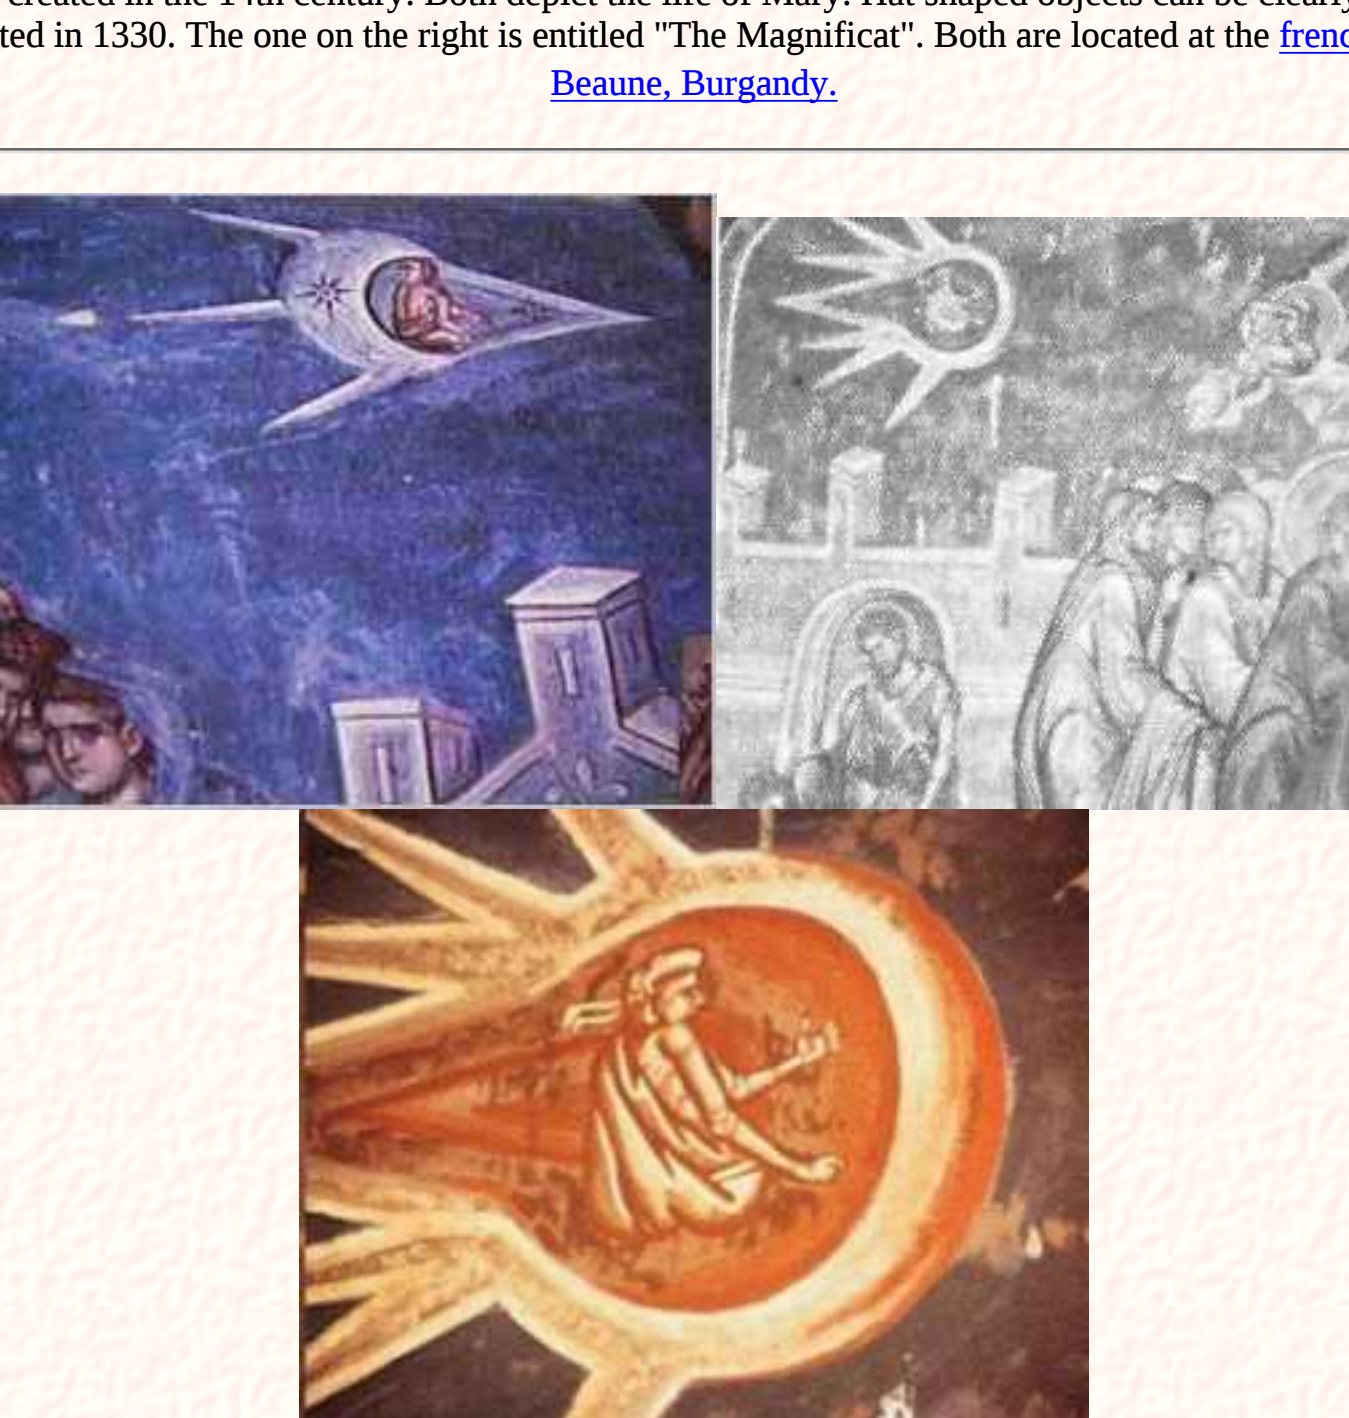

This is a sketch of an untitled 15th century Italian fresco from Mount Athos Monastery, Greece. It depicts the Apostle John dictating the Biblical book of Revelation to a young scribe. In the upper left hand corner is a segment of a glowing oval object from which a beam of light is aimed at the head of John. In the upper right hand corner is a typical disk-shaped object which is emitting a converging light beam. Maybe someone has an original of this fresco ?

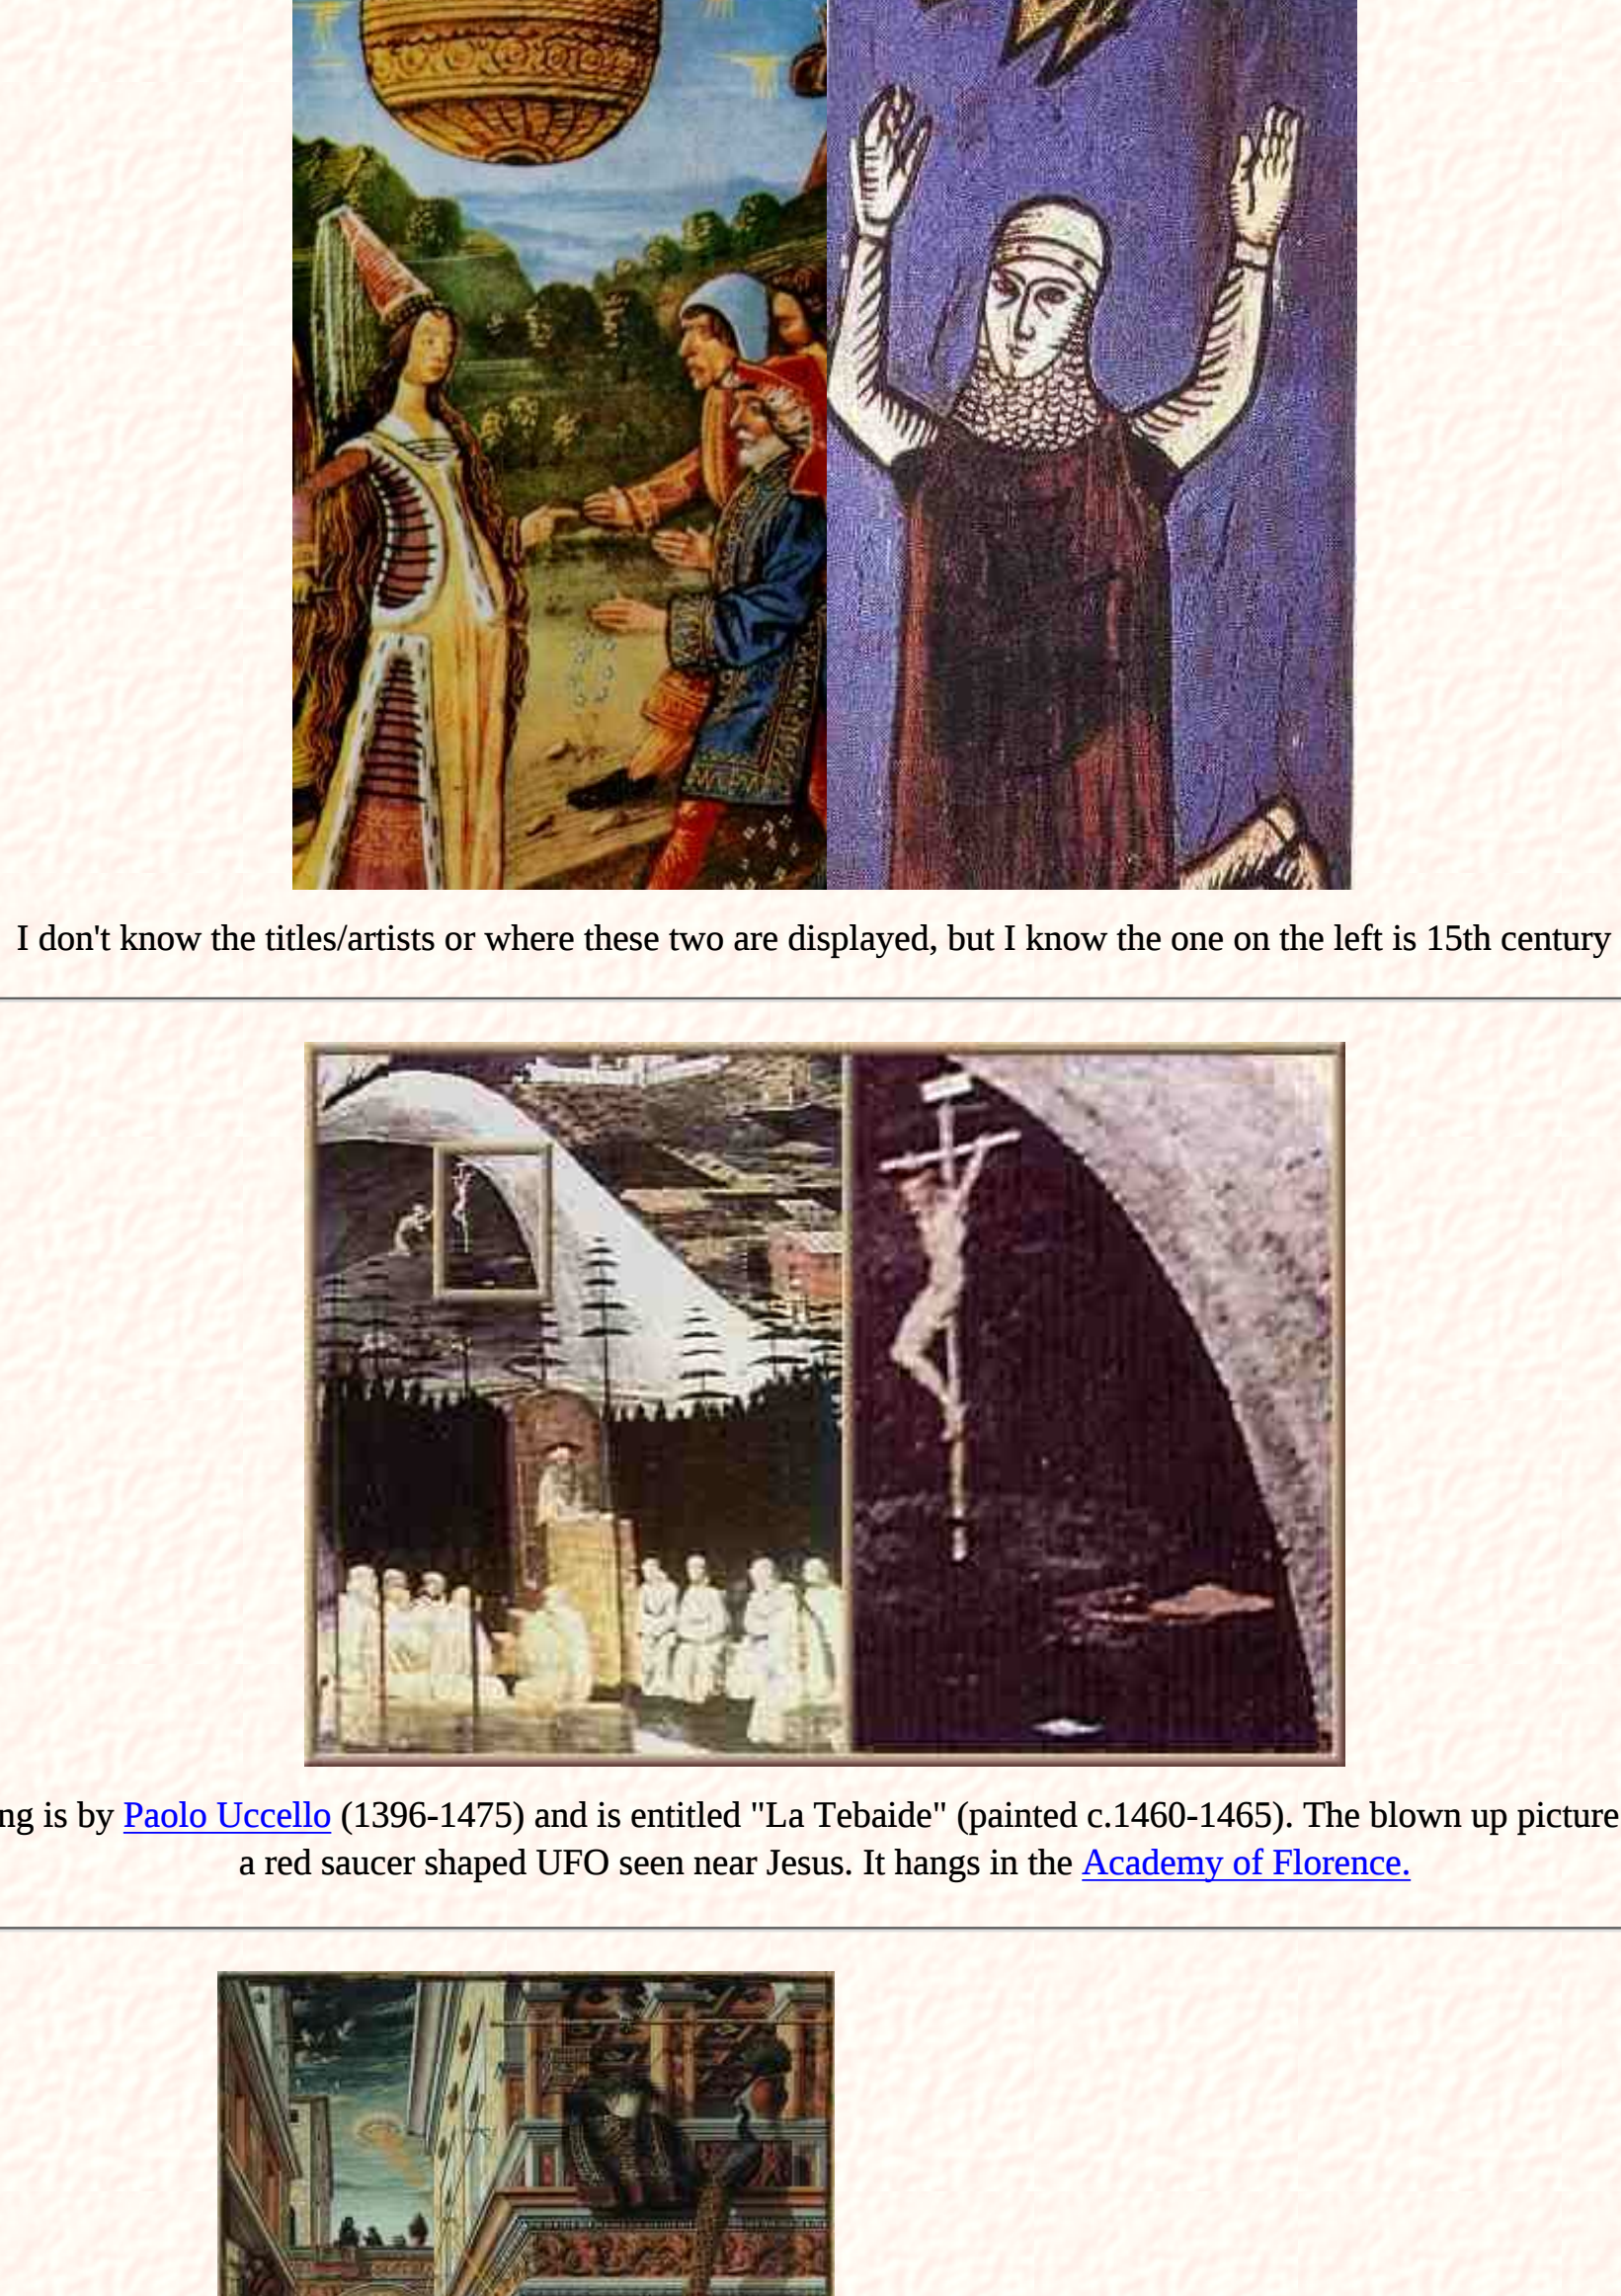

The above image comes from an ancient eastern text Prajñāpāramitā - Suna. In the enlargement you can see two objects that look like hats, but why are they floating in mid air ? also one of them appears to have port holes on it.

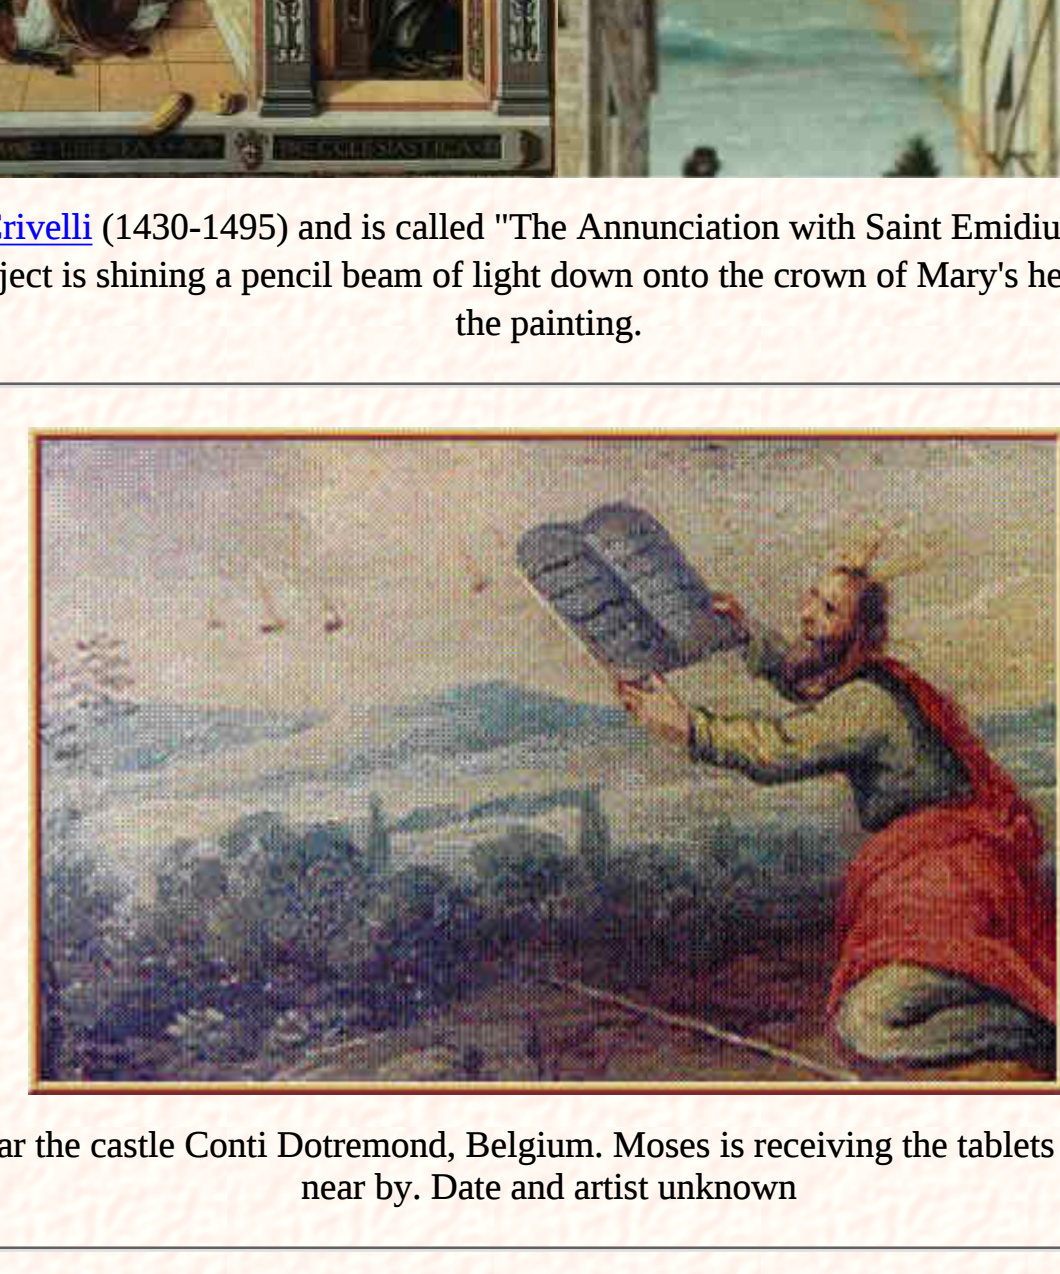

This is a renaissance illustration of a UFO sighting in Rome detailed in a book "Prodigiorum liber" by Roman historian Julio Obsequens.

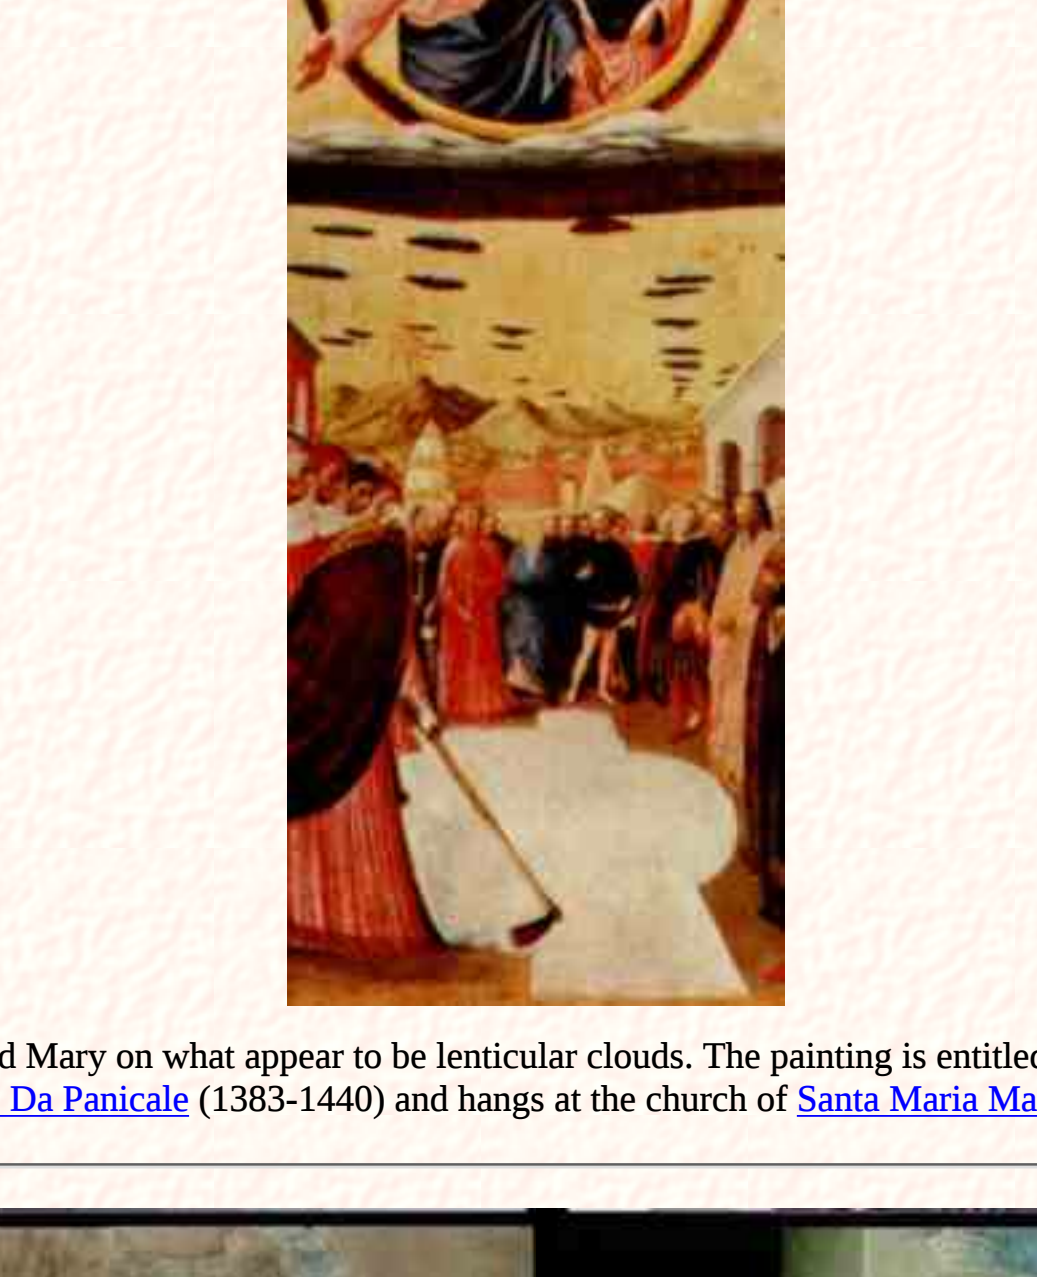

These two tapestries were created in the 14th century. Both depict the life of Mary. Hat shaped objects can be clearly seen in both tapestries. The one on the left was created in 1330. More lenticular clouds ! The above images are from "The legend of the True Cross" (1420) by [Piero Della Francesca](#) (1416-1420). Discoidal clouds feature throughout this fresco, of which there are a few examples above. The fresco is located in the [San Francesco Church in Arezzo, Italy](#).

This painting is called "The Madonna with Saint Giovannino". It was painted in the 15th century by [Domenico Ghirlandaio](#) (1449-1494) and hangs as part of the Loeser collection in the [Palazzo Vecchio](#).
